Planning the Individual Project

Summary of the Project

Creating an application for our client to help them with time management.

Goals

Giving the client what they've asked for on time, and within budget.

Why?

The client has requested a specific thing and as a Software Engineer it is my job to deliver it on time and within budget.

Milestones and Deadline

- **Deadline:** December 10th
- Milestone 1Date: 10/29Goal: Learn what the project would take
- Milestone 2Date: 11/09Goal: Begin Working on beginning structure
- Milestone 3Date: 11/12Goal: Create Prototype
- Milestone 4Date: 11/15Goal: Refactor Prototype
- Milestone 5Date: 11/25Goal: Work on Prototype and Testing
- Milestone 6Date: 12/9Goal: Submit
- Milestone 7Date: 12/9Goal: Submit project

Risk Analysis

1. My own work current ethic interfering on learning and working on this assignment
Working around my other courses, jobs, and activities
RA (24/7)
RA Meetings every Tuesday (6:00pm - 8:00pm)
Lead Bible Study every Wednesday (1:00pm - 2:00pm)
Leader Meetings every Wednesday (7:30pm - 9:30pm)
ROCKS Meetings every Thursday (6:00pm - 8:00pm)
ROCKS Office Hours every Friday (2:00pm - 4:00pm)

Project Progress

Week 1

Summary

Work on Setting up GitHub and looking into details of the project

Week 2

Summary

Gained Little progress

Week 1

Summary

Had other obligations and did not gain much progress

Week 1

Summary

Features updated

Week 6

Summary

Finished setting up new GitHub after prior corruption.

And finished features and testing/documentation.
